A Global Leader in Innovative Power and Control Technologies Successfully Implements SAP ERP Country India Version

Background

A Global Leader in Innovative Power and Control Technologies Successfully Implements SAP ERP Country India Version

The Need

- Use tally software to meet the acquired setup business requirements
- Integrate with the existing complicated global SAP system with various modules including sales, engineering, manufacturing, and distribution and financials
- Understand Indian dynamic compliance and regulatory rules and enable the Country India (CIN) version in the live system without affecting existing functionalities
- Structure the existing business processes that is in line with client processes and SAP best practices
- Educate and train the existing users with client specific and SAP processes in a shorter duration
- Document and educate the global legal and compliance team on CIN implications in global consolidation

GAVS' Solution

- Offered subject matter expertise and deep understanding of business operations in the Indian subcontinent to align the processes
- Deployed a team consisting SAP consultants and domain experts who helped interpret national laws and convert them to simple business jargon and configured the system to support global consolidation requirements
- Made custom developments to meet the client's specific business and taxation requirements
