COSTS

A leading Financial Services Provider Reduces IT Overhead Costs by Over 40% and Increases Operational Efficiency

Background

A leading financial services provider in Oman having strong presence in various finance verticals including: corporate, retail, investment, and Islamic banking. The client also operates in the treasury and asset management segments.

The Need

- Ensure disaster recovery (DR) by providing backup for the bank's corporate data center
- Provide end-to-end IT infrastructure support
- Identify and eliminate existing IT infrastructure bottlenecks
- Implement best practices to increase operational efficiency

GAVS' Solution

- Deployed a high-availability DR center aligned with the bank's goals, based on – IT assessment, prioritization of applications/infrastructure, readiness and migration plan
- Eliminated data bottle necks through application and hardware refresh/ upgrade
- Provided comprehensive level 2 and level 3 support for IT Infrastructure – desktop, network, server, database and storage
- Ensured maintenance and support for Temenos T24, the bank's core banking system
- Established ISO 9001, ISO 20000-1, and People Capability Maturity Model (PCMM) quality systems in the bank's IT department
