COSTS

GAVS Enables a Leading Global Publishing Company Optimize Resources and Reduce Cost Through Independent SQA Services

Background

A leading 200 year old global publishing company that produces and distributes a wide range of publications from letter press pamphlets to digital apps and interactive online learning tools.

The Need

- Move from product-based models to customer-centric models with digitization of content
- Facilitate cost effective Software Quality Assurance (SQA) services through a unified testing model focused on business lines

GAVS' Solution

- Integrated SQA model aligned with client's business lines and provided end-to-end SQA services through onsite-offshore model to reduce cost
- Facilitated on-demand SQA powered by GAVS' agile methodology and effective use of tools including Selenium and Rational functional tester for compressed test cycles and JIRA for defect management
- Established matured governance leveraging GAVS' SQA 2.0, utilizing governance tools including EMO and KPedia and by defining comprehensive SLAs to improve defect removal efficiency, defect coverage etc.
