# Leading Supplier of Graphics Equipment Enhances Process Efficiency and Effectiveness with ERP Systems' Testing

## Background

One of the world's leading suppliers of sign making and graphic design equipment, sign making software, and sign making materials and accessories.

## The Need

- Perform functional upgrade and migration of on-premise SAP instances across USA, Europe and China, to a cloud-based platform hosted by a third-party provider
- Assess the functional stability and performance of the migrated system, and underlying infrastructure needs

## GAVS' Solution

- End-to-end testing of the ERP system – including functional, non-functional and regression testing on the cloud environment using a HP Quality Center
- Scripting of over 400 critical functional scenarios leveraging the rapid development model
- Execution of the scripts to access the functional stability and performance of the cloud environment
