# GAVS Enables Mobile Apps Testing for a Leading Healthcare Organization Resulting in Reduced Operational Costs and Higher Availability

## Background

Over 120 years old voluntary, not-for-profit healthcare organization, with over one million annual patient visits.

## The Need

- Eliminate the current paper-based system and enable 100% automation of the shift-work process
- Verify and validate the application for function, performance and security

## GAVS' Solution

- Automated the entire shift work process, enabling doctors to access systems on-the-go via iPads
- Ensured end-to-end testing of the mobile app developed in iOS including functional, performance testing, memory leakage, usability and installation using inbuilt tools or 'instruments'
