## End-to-end Product Engineering Driven by DevOps & Tools

### Business Situation

Develop & manage the flagship product, 'ePCR' – "future-proof" compliance and a fully integrated suite enabling the data collection process. The Product helps the medics know the data they need to capture before a report can be closed; enabling the staff, Medical Director, and state data managers have everything they need to do their jobs successfully.

### Solution

- Solution with dynamically configurable screens to capture patient care data, an easy-to-use touchscreen interface, advanced reporting, graphical-workflow editor for PCR reviews, and a web-based solution for reviewing and editing patient care reports
- DevOps for on-demand QA environment through AWS - Environment created, apps deployed, data configuration, environment made available for testing, on completion of testing environment is destroyed
- Seamless release management, latest healthcare compliance (NEMESIS, 510K, ICD-10 & HL7) and complete production support for unparalleled performance & product experience
